Letter of Support  
12 STEP Program of New England

Let this letter serve as a support document for the services provided by 12 STEP for people needing housing and other basic services to maintain successful recovery.

We have known 12 STEP from its inception and both placed clients as well as provided ambulatory treatment services and emergency services for the residents. There is a firm recovery ethic and a consciousness of the needs and changes one needs to make for sustained recovery.

The housing has been a lifeline for those re-integrating into the community and for those who have been separated from family or other residence due to their illnesses. We support the sustained efforts in maintaining these services for people working on their recovery who need a base of daily support.

Respectfully,

Paul M. Brown  
Vice President of Ambulatory Services  
Choate Health Management  
Woburn, Ma. 01801
