SAFE & SOBER HOUSING FOR MEN & WOMEN

We have been in the business of providing sober housing for men and women since November, 1992. Countless individuals have come through our doors from all walks of life seeking help to learn healthier and sober lifestyles. Our residents come to us from homeless shelters, VA shelters, hospitals, treatment centers, detoxes, counselors, the justice system, family and self-referrals. We accept dual-diagnosed clients as long as they have not been prescribed mind-altering substances (i.e. benzodiazepines). We also have developed a relationship with Bournwood Hospital Program in Woburn. Transportation is provided to residents in our Woburn home.

Our mission to provide sober housing means providing safe housing. Our homes, unlike others, have regular, periodic inspections of our sprinkler and fire alarm systems as well as local health department inspections. We have 24-hour management as well and appropriate safety and health inspections.

We implemented a training program for our managers that keeps them up-to-date on the latest addiction information as well as skills and knowledge that allows them to be effective managers.

Twelve Step Education Program continually strives for excellence and safe, sober housing. Our Executive Director/Founder, Phil Malonson, is always available to share his experience about addiction and the value of sober housing helping those in need to get and stay sober. He shares his time and knowledge at staff meetings and organizational meetings. Phil has committed his time and speaks in the Mass. Correctional Institutions many times each month.

Through time and hard work, we have found that not all sober housing is the same. Clients that choose to live in our homes are cared for and safe. When placing clients, ask if there is a sprinkler system, a fire alarm wired to the local fire department. Inquire if and how often their premises are inspected for health and safety. Ask if they have the appropriate occupancy permits. Then call us. We have immediate openings in Billerica and Woburn
